"This is an excellent and reassuring way to learn sign language"

— Library Journal

Learning sign language is easier than you ever imagined. Using the Interax Video Sign Language Course you can develop signing skills at your own pace and convenience. By watching the tapes just a few minutes a day, you'll be amazed how many signs you learn and how easy they are to remember. Because you are learning from a professional sign language interpreter and instructor, you'll be able

to use your new language with confidence. Unlike books, video shows the motion, speed, direction, and important facial expressions of each sign. Instructor Lyn Cook clearly illustrates and immediately repeats each sign allowing you an opportunity to perform the sign.

The English equivalent of the sign being demonstrated is provided on the screen, allowing the hearing impaired to use the course without a caption decoder. The lesson and sign numbers aid in finding a particular section of the tape. Designed to fit into your schedule, the 6-1/2 hour course is divided into 57 subject related lessons. A Quick Quiz at the end of each lesson lets you check your comprehension, giving you confidence to move forward.

Upon completion of the course you will have learned over **1200** signs of **American Sign Language (ASL)**, giving you the ability to communicate effectively with the deaf.
